

Inter-Tel® 3000 Voice Mail

Easy as 1-2-3:

- 1** The Inter-Tel 3000 Voice Mail can be added to the Inter-Tel 3000 system at the time of installation or as a future enhancement. Voice mail includes day/night auto attendant, customizable courtesy service, 83 mailboxes, Record-A-Call, Remote Message Notification and more.
- 2** The Inter-Tel 3000 Voice Mail can be programmed in a matter of minutes through an Inter-Tel 3000 feature phone or Windows®-based PC programming software and can even be maintained remotely.
- 3** Phone users can change greetings, passwords and even monitor/screen messages as they are being left by callers. Messages can be checked from any phone on the system or remotely by dialing into the system.

Inter-Tel 3000 Voice Mail Features:

- Available options include: 2-, 4- or 8-port with 5, 10 or 20 hours storage respectively
- Day/night auto attendant
- Customizable courtesy service
- Dial-by-name directory
- Temporary greeting
- (1) General mailbox
- (52) Extension mailboxes
- (20) Group mailboxes
- (10) Phantom mailboxes
- Record-A-Call
- Remote Message Notification

Inter-Tel® 3000 Voice Mail Programming

Easy as 1-2-3:

- 1** Simply install the voice mail card into the Inter-Tel 3000 CCU (Central Control Unit).

- 2** Identify customer requirements for auto attendant and voice mail and program accordingly via Inter-Tel 3000 programming extension or Windows-based PC software.

- 3** Record auto attendant and courtesy service greetings via an Inter-Tel 3000 system phone, then notify users of their voice mail password and how they can record a new personal greeting and change their password.

Done!
